

INVENTING TOMORROW'S MATERIALS

OUR MISSION

INVENTING THE MATERIALS OF TOMORROW

90% of the plastic waste produced worldwide ends up in landfills or incinerated.

50% of the natural resources extracted each year are consumed by the construction sector.

At Le Pavé®, we have DECIDED TO ACT by recycling this waste in the construction sector, sustainably.

Because we are convinced that it is possible to build the world of tomorrow while cleaning up the world of today.

Thanks to a patented industrial process, Le Pavé manufactures sustainable materials in the form of panels.

Our first material, SoftSurface™, is made from plastic waste that has been given a second life.

It is thanks to all the architects, craftspeople, and manufacturers committed to working with us that it has already found its place in more than 2,300 completed projects while recycling more than 1,300 tons of waste.

**THE
SOFTSURFACE™**

DID YOU KNOW?

Less than 15% of polystyrene (PS) waste is recycled.

These include refrigerators, hangers, food trays, and WEEE (electrical and electronic waste such as keyboards, TV cases, internet boxes, etc.).

This is where SoftSurface™ was born, made up of up to 100% plastic waste and without any added resin.

8 good reasons to choose SoftSurface™:

Stain-resistant and easy to maintain

Recycled and recyclable

Massive and structural

Easy to work with

Thermoformable

Glueable & varnishable

Stable and resistant

2-year warranty

SOFTSURFACE™

4 ranges
10 colors available

8, 12, 15 OR 19 mm thick*

1350 x 900 mm
2400 x 1350 mm**

8mm

1350 x 900mm: 10.2 kg of recycled waste

12mm

1350 x 900mm: 15.3 kg of recycled waste
2400 x 1350mm: 40.8 kg of recycled waste

15mm

1350 x 900mm: 19.1 kg of recycled waste
2400 x 1350mm: 53 kg of recycled waste

19mm

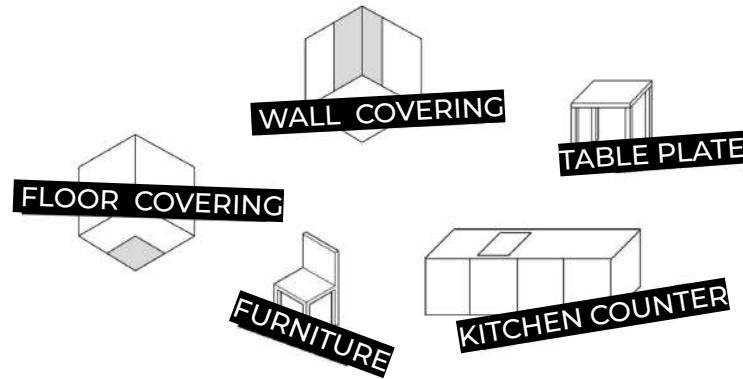

2400 x 1350mm: 65 kg of recycled waste

APPLICATIONS

SoftSurface™ is characterized by its **versatile application potential**.

Interior design, wall coverings, flooring, countertops, furniture, objects: **there are no limits to creativity**.

Without compromising ethics and aesthetics, and extremely soft to the touch, SoftSurface™ finds its place in every project.

*excluding Quartz and Terrazzo only available in 1400x900 mm, thickness 15 and 19 mm

LE PAVÉ®

ENVIRONMENTAL IMPACT

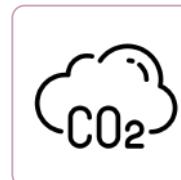

At Le Pavé, we design meaningful materials that can actively **contribute to the ecological transition and the development of our regions.**

LE PAVÉ®

ENVIRONMENTAL IMPACT

CARBON FOOTPRINT PER M2

→ SoftSurface™ allows CO₂ emissions to be divided by up to 10 for equivalent material

The assumptions made by the manufacturers of the materials used vary considerably across the EPDs we studied. Therefore, to facilitate comparison, we chose to focus on the actual data provided between phases A1 and A3, including the raw material and the manufacturing phase.*
The results for the 12 mm SoftSurface PS were calculated from our EPDs for the 15 mm PS, using a thickness factor.

+2300 projects completed

SoftSurface™ PS

SoftSurface™ PS is made from 100% recycled polystyrene (PS) plastic waste. This material is rigid, adherent, and durable. The panels are available in several thicknesses: 8, 12, and 15 mm.

The standard SoftSurface™ range comes in three color ranges: Originals, Colors, and Collection. Each color is made from specific plastic waste.

DID YOU KNOW ?

Polystyrene (PS) is a material that receives very little recovery.

Less than 15% of the virgin PS produced is recycled; the rest is landfilled or incinerated.

Quantity of recycled waste depending on the thickness of the SoftSurface™ (PS)

8 mm · 140x90cm : 10,2 kg of recycled waste

12 mm · 140x90cm : 15,3 kg of recycled waste
240x135cm : 40,8 kg of recycled waste

15 mm · 140x90cm : 19,1 kg of recycled waste
240x135cm : 53 kg of recycled waste

19 mm · 140x90cm : 24,2 kg of recycled waste
240x135cm : 67 kg of recycled waste

A glimpse of a landfill filled with end-of-life refrigerators

SoftSurface™ PS Originals

Only available in 1350 x 900 mm and 15 mm thickness.

SOFT WHITE 001

White base

Refrigerator doors, yogurt pots, coat hangers

Transparent fragments

Transparent shreds from industrial production (petri dish type)

SOFT BLACK 002

Black base

D3E : electrical or electronic waste (keyboards, internet boxes, TV casings)

Transparent & white fragments

Transparent: from industrial production (petri dishes) and white: refrigerator doors

SOFT WHITE & BLACK 003

White base

Refrigerator doors, yogurt pots, coat hangers

Transparent & black fragments

Black: electronic waste (keyboards, internet boxes, printers) and transparencies: industrial production (petri dishes)

SOFT WHITE & MULTICOLOR 004

White base

Refrigerator doors, yogurt pots, coat hangers

Colored fragments

Core shreds (red and violet) and transparent shreds from industrial production (petri dish type)

SoftSurface™ PS Colors

Only available in 1350 x 900 mm and 15 mm thickness.

SOFT BLUE 011

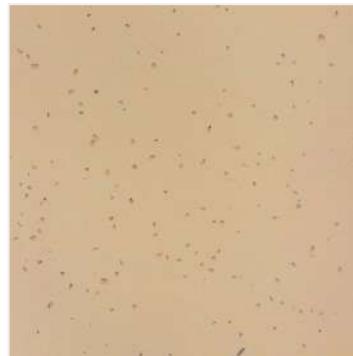

Blue base

Recycled refrigerator doors,
yogurt pots, coat hangers
+ 3% blue pigments

Transparent fragments

Transparent shreds from
industrial production (petri dish
type)

SOFT BEIGE 012

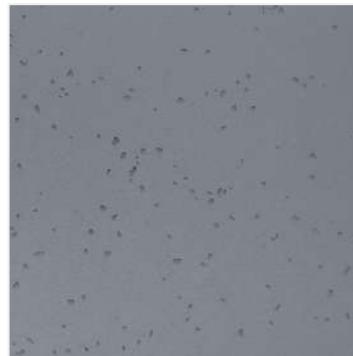

Beige base

Recycled refrigerator doors,
yogurt pots, coat hangers
+ 2% beige pigments

Transparent fragments

Transparent shreds from
industrial production (petri dish
type)

SOFT GREY 013

Grey base

Recycled refrigerator doors,
yogurt pots, coat hangers
+ 2% grey pigments

Transparent fragments

Transparent shreds from
industrial production (petri dish
type)

SOFT GREEN 014

Green base

Recycled refrigerator doors,
yogurt pots, coat hangers
+ 3% green pigments

Transparent fragments

Transparent shreds from
industrial production (petri dish
type)

SoftSurface™ PS Collection

Only available in 1350 x 900 mm and 15 mm thickness.

QUARTZ WHITE 021

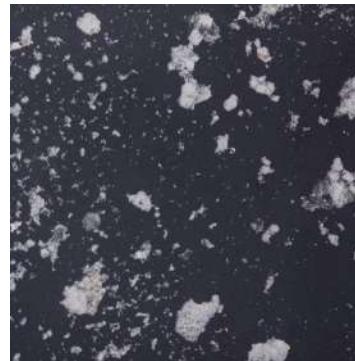

White base

Refrigerator doors, yoghurt pots, hangers

“Crystal” fragments

Crushed food trays (such as fish trays), polystyrene insulation or foam

QUARTZ BLACK 022

Black base

D3E : electrical or electronic waste such as keyboards, internet boxes, TV casings

“Crystal” fragments

Crushed food trays (such as fish trays), polystyrene insulation or foam

Range not in stock, contact us for details.

SoftSurface™ Flex

Available in 1350 x 900 mm

Flexibility & Adaptability

Thanks to its flexibility, SoftSurface™ Flex adapts to curved or complex surfaces, opening the way to applications impossible with a rigid panel (designer furniture, organic cladding, curved structures, etc.).

Creative freedom for architects & designers

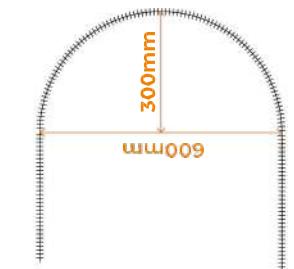

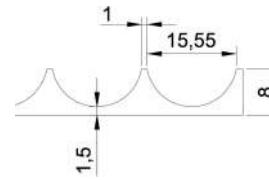

It allows them to push aesthetic boundaries, combining the premium look of a recycled material with the ability to create original, fluid, and contemporary shapes.

Unchanged performance & durability

Despite its flexibility, it retains the same advantages as classic SoftSurface™: a 100% recycled, durable, strong, and certified material that combines technical performance with a reduced environmental impact.

LVMH orange™

A massive glacier calving into a dark blue ocean. A large amount of white spray is visible at the base of the calving face. The glacier itself is a mix of white and deep blue, with intricate crevasses and textures. The ocean is a deep, dark teal.
