

The image shows the cover of the Pierreplume 2023 catalogue. The background is a dark blue, textured material, possibly recycled textile, with a vertical seam on the right side. The right side of the cover features a large, light-colored, textured material, possibly recycled paper or fabric, with a geometric pattern of triangles and lines. The text is white and positioned on the left side.

Aesthetic, ecological and acoustic material for
architecture and design

pierreplume®

Reinvent textile recycling through design

Pierreplume® is a creator of recycled textile material for architecture and design. All our materials are made in France from recycled fibers from France and Belgium.

Acoustic and aesthetic, our range of materials is at the service of designers and creators, to promote more environmentally friendly projects. Our materials highlight the aesthetic potential of recycled textile fibers.

Available in several shades and patterns, our materials are applied as wall cladding in interior spaces that have acoustic and aesthetic needs (offices, meeting rooms, hostels, restaurants, entrance hall, private house). Our materials can be used as wall coverings for interior design and can also be used for other creative purposes such as design, art, events and many more.

Overview

eco-conception

All our products are made in France

MADE IN FRANCE

70 %
of recycled fibres coming
from the industry and clothing domain.

RECYCLED

technique

ACOUSTIC
ABSORBANT

Reduction of ambient noise
and echoes
(alpha w : 0,25 to 0,30 MHz)

fonctional

LIGHT

thickness : 12 mm
weight : 1800 g. / sq.m.
standard shape: 1000 x 600 mm
maxi shape: 2000 x 1000 mm

customisable cutting

We offer custom cutting for your projects,
set design, logos, signage...

We create your own recycled textile material!

You are a company and you have textiles you want to upcycle?
We develop with you matériaux from your own deposit.

About us

The interior design and architecture agency **Premices and co** is at the origin of the **Pierreplume®** project. The agency is composed of Camille Chardayre, Amandine Langlois and Jérémie Triaire, three designers who graduated from the Ecole Boule and who have been using their design skills to address the challenges of the circular economy since 2013.

The agency is spread over three activities: design, awareness and manufacturing. Each of these activities serves in its own way the agency's main mission: to create by using the waste produced by our society as resources.
