## Ramp Building: Screw Patterns

These grids are intended for general reference. The vertical screw placement will need to be adjusted as necessary to correspond with the framing of the ramp.

## **Diamond Grid**

This is the pattern structure we recommend for optimal dimensional stability of the sheets to provide a smoother ride.

## 48" (1220mm) (152mm) — 6" — (305mm) -- 12" ---3/4 3/4" (19mm) (19mm) Drill with 3/16 (5mm) (2440mm) bit and Countersink for screw/heads ..96 Vertical Screw Placement varies based on framing

## Standard Grid

This is the most common grid used on existing ramps.
